

# tasktrackr

## Introduction

Tasktrackr is an application for all of your reminder needs allowing seamless creation and management of tasks. Users are able to create, complete, and review tasks from members of their team or management.

## Features

- Task Homepage - View, create, and complete tasks
- Calendar - Day to Day, Month to Month view of when tasks are due as well as an expansion of task details
- Members - View and Edit Members' account information for better user account control
- User account management - Login and Creation of accounts

## System Requirements

- Programming Languages: HTML, PHP, CSS, and MySQL
- Software: XAMPP and Notepad++
- Browsers: Microsoft Edge, Google Chrome, Firefox
